# REPORT

RELATING TO THE REGISTRATION OF

# BIRTHS, MARRIAGES AND DEATHS

IN THE

# PROVINCE OF ONTARIO

FOR THE

YEAR ENDING 31st DECEMBER

1930

(BEING THE SIXTY-FIRST ANNUAL REPORT)

PRINTED BY ORDER OF
THE LEGISLATIVE ASSEMBLY OF ONTARIO
SESSIONAL PAPER No. 13, 1931

SIR:

I have the honour to submit for your approval the Sixty-first Annual Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1930.

I have the honour to be, Sir,

Your obedient servant,

Deputy Registrar-General.

To the Hon. Forbes Godfrey,

Registrar-General of Ontario.

To His Honour the Lieutenant-Governor of the Province of Ontario.

May It Please Your Honour:

I herewith beg to present for your consideration the Sixty-first Annual Report of the Registrar-General, relating to the Registration of Births, Marriages and Deaths in the Province of Ontario during the year 1930.

Respectfully submitted,

FORBES GODFREY,

Registrar-General of Ontario.

# CONTENTS

# LIST OF VITAL STATISTICS TABLES FOR 1930 FOR PROVINCE OF ONTARIO

		GENERAL SUMMARY TABLES	PAGE
TABLE	1	General summary of births, deaths and marriages in Ontario by county municipalities (including cities and towns), 1930	AGE 1
TABLE	1A	Number of births, deaths and marriages, and the ratio per 1,000 of population in each county (excluding cities and towns of 5,000 population and over), Ontario, 1930	2
TABLE	2	General summary of births, deaths and marriages in Ontario for cities, 1930.	3
TABLE	2A		3
TABLE	<b>2</b> B	General summary of births, deaths and marriages in Ontario, for towns of 1,000 population and under 5,000, 1930	4
		Births	
TABLE	3	Births (exclusive of still-births) by months, classified as rural and urban for Ontario, by counties, 1930	5
TABLE	4	Total births (exclusive of still-births) and births in public institutions, showing the number of mothers non-resident in the Province of Ontario, 1930	8
TABLE	5	Births (exclusive of still-births) to resident and non-resident mothers and birth) in public institutions in the cities and towns of Ontario, of 5,000 population and over, 1930	9
TABLE	6	Births (exclusive of still-births) classified as legitimate or illegitimate, and as single or plural by sex, for cities and towns of 5,000 and over, 1930	10
TABLE	7	Births (exclusive of still-births) and classified according to ages of parents, Ontario, 1930	12
TABLE	8	Births (exclusive of still-births) classified according to racial origin of parents, Ontario, 1930	14
TABLE	9	Legitimate births (exclusive of still-births) classified according to age and racial origin of mothers, Ontario, 1930	16
TABLE		Births (exclusive of still-births) classified according to birthplace of parents, Ontario, 1930	18
TABLE		Legitimate births (exclusive of still-births) classified according to age and birthplace of mother, Ontario, 1930	20
TABLE	12	Plural births classified to show number of children born alive and still-born by sex in the Province of Ontario, 1930	22
		Marriages	
TABLE	13	Marriages in Ontario by months, 1930	22
TABLE	14	Marriages—Conjugal condition of contracting parties, Ontario, 1930	22
TABLE	15	Marriages reported in rural and urban parts of counties, Ontario, 1930	23
TABLE	16	Marriages—Ages of bridegrooms and brides, Ontario, 1930	24
TABLE	17	Marriages—Denominations of contracting parties, Ontario, 1930	25
TABLE	18	Marriages—Birthplace of bridegrooms and brides, Ontario, 1930	26
TABLE	19	Marriages—Literacy of bridegrooms and brides, in Ontario, classified by birthplace, 1930	28
	,	Infant Mortality	
TABLE	20	Deaths of children under one year (exclusive of still-births) in Ontario, by months, classified as rural and urban by counties, 1930	29
TABLE	21	Total deaths (exclusive of still-births) and deaths in public institutions, of children under one year of age showing the number non-resident in the Province of Ontario, 1930	33

		PAGE
TABLE 22	Total deaths (exclusive of still-births) and deaths in public institutions, of children under one year of age, classified according to residence of decedents in cities and towns of Ontario of 5,000 population and over, 1930	34
Table 23	Deaths of children under one year (exclusive of still-births), by age at death, Ontario, 1930	36
Table 24	Deaths of children under one year of age (exclusive of still-births) classified according to racial origin of decedents, Ontario, 1930	37
TABLE 25	Deaths of children under one year of age (exclusive of still-births) classified according to birthplace of parents, Ontario, 1930	38
Table 26	Deaths of children (exclusive of still-births) from certain specified causes in first year of life by months, Ontario, 1930	40
TABLE 27	Deaths of children (exclusive of still-births) from certain specified causes in first year of life by ages, Ontario, 1930	42
Table 28	Total deaths (exclusive of still-births) and deaths in public institutions, showing the number non-resident in the Province of Ontario, 1930	43
Table 29	Total deaths (exclusive of still-births) and deaths in public institutions, classified according to residence of decedents, in cities and towns of Ontario of 5,000 population and over, 1930	44
Table 30	Deaths (exclusive of still-births) by single years of age and by age groups, Ontario, 1930.	46
Table 31	Deaths (exclusive of still-births) classified by racial origin of decedents in Ontario, 1930	47
TABLE 32	Deaths (exclusive of still-births) classified according to birthplace of decedents for the Province of Ontario and for cities and towns of 10,000 population and over, 1930	48
TABLE 33	Deaths (exclusive of still-births) classified according to birthplace of parents of decedents for Ontario, 1930	52
TABLE 34	Causes of death by sex and age, Ontario, 1930	54
TABLE 35	Causes of death by sex and age, Toronto, 1930	70
TABLE 36	Causes of death by sex and age, Hamilton, 1930	85
TABLE 37	Causes of death by sex and age, Ottawa, 1930	97
TABLE 38	Causes of death by sex and age, London, 1930	109
Table 39	Causes of death for each sex by conjugal condition, nativity and month of death, Ontario, 1930	118
Table 40	Causes of death for each sex by conjugal condition, nativity and month of death, Toronto, 1930	142
Table 41	Causes of death for each sex by conjugal condition, nativity and month of death, Hamilton, 1930	164
Table 42	Causes of death for each sex by conjugal condition, nativity and month of death, Ottawa, 1930	180
Table 43	Causes of death for each sex by conjugal condition, nativity and month of death, London, 1930	198
Table 44	Causes of death by counties (exclusive of cities and towns of 5,000 and over), Ontario, 1930	212
Table 45	Causes of death for cities, Ontario, 1930	226
TABLE 45A	Causes of death for towns of 5,000 population and over, Ontario, 1930	240
Table 46	Maternal mortality in the Province of Ontario, 1930	250

70–74	24,864	23,506	48,370
75–79	15,288	14,198	29,486
80-84	8,232	8,002	16,234
85–89	3,024	3,271	6,295
90 and over	1,344	975	2,319

#### BIRTHS

	193	30	192	9
	Number	Ratio	Number	Ratio
Province	71,263	21.5	68,485	20.9
Cities		23.1	32,478	23.3
Towns	6,456	28.9	6,288	29.2
Rural	30,380	18.6	29,692	17.8

The number of births registered was 71,263. This was a numerical increase of 2,778. The rate was 21.5, being 0.6 of an increase. Ontario stood fifth of all the Provinces in respect to the birth rate.

### NUMBER OF BIRTHS AND RATE FOR 10 YEARS

Year	Number	Ratio	Year	Number	Ratio
1921	74,152	25.3	1926	67,617	21.5
1922	71,320	23.9	1927	67,671	21.2
1923	70,056	23.1	1928	68,510	21.2
1924	71,510	23.3	1929	68,458	20.9
1925	70,122	22.6	1930	71,263	21.5

### NATURAL INCREASE BY RATES PER 1,000 OF POPULATION

	Birth Rate		Rate of Natural Increase		Birth Rate	Death Rate	Rate of Natural Increase
1911	.22.2	12.6	9.6	1921	25 . 3	11.8	13.5
1912	.22.9	12.5	10.4	1922	23 . 9	11.4	12.5
1913	.22.7	13.1	9.6	1923	23 . 1	11.8	11.3
1914	.25.0	12.2	12.8	1924	23 . 3	10.8	12.5
1915	.24.9	12.3	12.6	1925	. 22.6	10.9	11.7
1916	.23.9	13.0	10.9	1926	21 . 5	11.4	10.1
1917	.22.6	12.0	10.6	1927	21 . 2	10.9	10.3
1918	. 23 . 0	15.3	7.7	1928	. 21.2	11.5	9.7
1919	.22.0	11.9	10.1	1929	20 . 9	11.7	9.2
1920	.25.1	14.0	11.1	1930	21 . 5	11.2	10.3

The number of illegitimate births registered during the year was 2,651, being 275 more than for 1929. This gives a rate of 37.2 per 1,000 living births, or 3.72 per cent. The rate continues to increase and this Province shares with Manitoba the highest illegitimacy rate in the Dominion.

The table following shows how steady has been the increase especially since 1918. Two peaks are indicated: beginning with the low rate of 12.5 in 1905 there is a rise to 1914 (22.1), then a decline to 1918 (18.2), then a steady rise to the present highest point of 37.2 which is almost three times the rate of 1905.

### ILLEGITIMATE BIRTHS

	Rate per 1,000	living Births	
190117.7	190913.7	191620.9	192322.5

1919	2,091	32.2	1929	2,730	38.8
1920	2.495	33.3	1930		36.6

The number of still births registered as births during the last twenty years is shown above. It will be noted at once that the rates of still-born children to total births has almost doubled in this period and while it is true that it represents between three and four per cent. of all births, nothing is being done in a large way to ascertain the causes of still births. These figures represent only children who had reached "viable age," that is to say, about seven months. How many more children were born prematurely before this period it is impossible to say as it is not considered necessary to register a premature birth as a birth or as a death, which has not reached this age. The saving of these children, if that were possible, would add to the assets of the Province.

### PLURAL BIRTHS

There were 839 cases of twins of which 885 were males and 793 females. Of six cases of triplets, 10 were males and eight females.

(See Table 12 for a classification of these.)

# CONFINEMENTS

Multiple births	845
Single living births.	69,681
Single still births	2,599
	73 125

(See Table 12 for an analysis of above figures.)

# BIRTHS BY AGES OF PARENTS

(See Table 7, page 12.)

It may be interesting to note that there were six children born to married mothers under 15 years of age and five to unmarried mothers under 14 years. There were two children born to mothers over 50 years of age and 56 children to fathers over 65 years of age.

### MARRIAGES

	1930		1929	
	Number	Ratio	Number	Ratio
Province	25,605	7.7	27,605

1924	. 24,038	7.8	1929	27,605	8.4
1925	. 23.074	7.4	1930	25.605	7.7

The tables dealing with marriages from various angles are numbered 13 to 19.

#### DEATHS

	1930		1929	
	Number	Ratio	Number	Ratio
Province	37,313	11.3	38,123	11.7
Cities	17,681	12.1	17,810	12.8
Towns	3,041	13.6	3,225	15.0
Rural	16,717	10.2	17,088	10.2

There was a numerical decrease of 810 deaths during the year and a decrease of 0.4 in the rate. In comparison with the other Provinces, Ontario had the third highest mortality rate.

The number of deaths for a decade and rates are shown in the following

table.

# DEATHS AND RATE PER 1,000 OF POPULATION FOR 10 YEARS

Year	Deaths	Ratio	Year	Deaths	Ratio
1921	34,034 35,736 33,078	11.8 11.4 11.8 10.8 10.9	1926	34,775 37,128 38,123	11.4 10.9 11.5 11.7 11.3

### TEN HIGHEST CAUSES OF DEATH IN EACH YEAR PER 100,000 OF POPULATION

(a) Organic heart disease							-

In the above table it will be noted that organic diseases of the heart which has held first place as a cause of death for many years still maintains it. There is a decrease in number and in rate, the first decrease since 1924 and whereas the decrease in 1924 was 7.5 in the rate, the decrease between 1929 and 1930 is 10.0 per 100,000 of population.

Deaths from pneumonia, influenza and tuberculosis show the lowest rates in the decade.

This is true also for deaths from apoplexy. It is possible, however, that the low rate is in some measure due to diagnoses attributing a larger number of deaths to diseases of the arteries. This cause shows the highest rate ever reached.

Deaths from external causes continues to increase its rate by a little better than 1 per cent. per annum, i.e., the rate in 1930 is 12.4 per cent. higher than that of 1920.

The rate of deaths from Bright's disease has increased 15.7 per cent. in the decade.

### COMMUNICABLE DISEASES

The following table shows the number of deaths and rate per 100,000 population for the communicable diseases:

	19	921	19	22	19:	23	19	024	19	25	19:	26	19	927	19	28	19	29	19	030

The following Table is appended to allow a comparison in respect to births classified according to place of occurrence and place of residence. In the first column appears the number of deaths which took place in the various counties followed by the rate per 1,000 population and the third column shows the number of deaths of residents of the county having regard to residence only and not to the place of death, so that where the third column contains a larger number than the first column it shows that a number of the residents died in some other county and where the number in the first column is greater than in the third, the difference would indicate a balance of non-residents.

8. All others	1,003	656					584			550	

# (B) RATE PER 1,000 LIVING BIRTHS

	1921	1922	1923	1924	1925	1926	1927	1928	1929	1930	Mean
Total	91.2	82.9	84.9	75.8	78.9	78.4	71.1	71.2	76.0	73.9	78.83
1. Whooping cough 2. Influenza 3. Convulsions 4. Respiratory diseases 5. Diseases of digestive	2.3	$\frac{1.4}{2.0}$	1.6	1.8	1.8 1.5	2.4	$\frac{1.4}{1.2}$	2.1	3.0 0.9	1.2	2.02 1.67 1.49 9.48
tract 6. Malformations 7. Congenital weakness 8. All others	15.9 6.3 39.3	6.8	7.0 38.8	7.7	10.9 8.1 34.8 10.2	$\begin{array}{c} 7.1 \\ 37.0 \end{array}$	6.5 35.7	6.3 33.9	6.7 35.9	13.8 6.4 33.7 7.7	6.91

The above tables indicate a slight increase in the number of deaths of children under one year of age, with a decrease in the rate of 7.9 per 1,000 living births. This is the greatest decrease since 1924 when the rate dropped 9.1 and it is not the lowest rate by 2.8, the lowest rate being 71.1 reached in 1927.

The chief causes remain unaltered. For a further analysis of causes of

death of children under one year, see Tables 26 and 27.

As to ages, *i.e.*, by days, weeks, months, see Table 23. It will be noted that about 20 per cent. of all children who die under one year of age die before they have completed one full day. Over 39 per cent. do not live to complete one full week and over 52 per cent. do not complete one month.

The death rate since 1901 when it was 120.0 per 1,000 living births has

declined to 73.9 at which it stands to-day.

In other words over 7 per cent. of all babies born alive die under one year and of those who die in the first year of life, one-fifth die before they are 24 hours old, one-third before they are one week old, one-half before they are a month old.

# DEATHS FROM EXTERNAL CAUSES (EXCLUDING SUICIDES)

The following table shows the chief causes of accidental deaths, and rate per 100,000 of population:

	1921	1922	1923	1924	1925	1926	1927	1928	1929	1930
Total	1,893 64.52	1,807 60.60	1,791 59.11	1,760 57.45	1,871 60.28	1,901 60.41	1,997 62.66	2,355 72.90	2,386 72.94	2,370 71.53
Burns	358 12.2 128 4.36 117 3.99 108 3.66 301 10.26	277 9.29 5 128 4.29 5 123 4.13 3 103 3.45 5 247 8.28		308 10.05 198 6.46 169 5.52 205 6.69 169 5.52	326 10.48 190 6.11 115 3.70 256 8.24	298 9.78 259 8.50 208 6.83 242 7.96 199 6.54	313 9.82 266 8.34 160 5.02 387 12.1 192 6.02	373 11.5 325 10.0 168 5.20 437 13.5 191 5.91	302 9.24 384 11.75 159 4.86 556 16.99	341 10.29 450 13.57 163 4.91 517 15.50 63 1.90

In the above table will be noted the increase in the number of deaths from falls, the highest rate ever reached; over 14 per cent. of all accidental deaths were from falls. Automobiles, while claiming 49 fewer lives, accounted for 21.8 per cent. of accidental deaths and drowning took 14.39 per cent., and 30.3 per cent. were accounted for by many other types of accidents.
